

CLEMENT[®]

creating light...beautifully[™]

**Accessories for
Clement Steel Windows & Doors**

At Clement we offer a select range of accessories to perfectly complement our stunning steel windows, doors and screens.

Carefully crafted in a number of different styles and available in a choice of colours and finishes, the handles, peg stays, hinges and ancillaries we offer are made from the finest quality materials and manufactured with the latest technology in mind. They not only look wonderful, they will also function faultlessly, enhancing the individual character of your property, whether it is a heritage building or something more modern.

If you would like to discuss your window requirements, please call us on **+44 (0) 1428 643393** or visit our website **clementwindows.co.uk**. Our sales team will be able to advise you on the best options for your specific requirements.

STANDARD RANGE

Our selection of window and door handles ranges from the elegantly traditional to the fashionably contemporary. Each handle comes with a number of choices relating to the locking mechanism, finish and other options allowing you to choose the best match for your project.

All window and door handles are supplied with single point locking as standard. Single point locking handles can be furnished with either a key or a grub screw, but they can also be provided as non-locking.

Standard finishes are included in the price (see page 11), although there are a number of other options, such as painting the handles to match the RAL colour of your window or door frames.

Matching peg stays are available in a number of different lengths depending on the size of your window. Peg stays can be supplied as either RH or LH opening.

There are also several different back plates available.

If you cannot find what you are looking for in this brochure, please speak to a member of the Sales team.

Single point locking window handles

Brook handle

We have made every effort to show the colours and finishes as true to the actual products as possible. However, due to the variations in monitors and browsers, colour samples may appear differently.

STANDARD RANGE

Ash pull door handles

We offer a range of Ash pull door handle options for internal doors as part of our standard range. Please note Ash pull handles are not standard for external doors.

Aluminium handles can be polished, anodised or powder coated in an appropriate RAL colour to match the frames. Stainless steel handles can be either polished or brushed.

Styles include off set or straight.

*Ash pull handles
polished aluminium finish*

PREMIUM RANGE

In addition to our standard range, Clement offers a selection of beautiful premium handles from Frank Allart – many of which are based on period originals - to accompany your bespoke fenestration. Various window and door handles are available, as well as peg stays, from a number of Frank Allart ranges, including the popular Berkeley, Soho and Deco ranges shown below. For further information, please speak to one of our sales advisers.

Single point locking window handles

Berkeley handle

Frank Allart finishes are skilfully created and then applied by their experienced and committed craftspeople to the highest possible standard in order to meet the aspirations of discerning customers. A snapshot of the Frank Allart range of colours is shown here. With more than 30 finishes and patinas on offer, you will be sure to find the right one to coordinate with your design scheme.

We have made every effort to show the colours and finishes as true to the actual products as possible. However, due to the variations in monitors and browsers, colour samples may appear differently.

ALTERNATIVE OPENERS FOR WINDOWS

As well as handles and peg stays, we offer a selection of alternative window openers, as shown below.

These are available as either RH or LH opening.

Several of these openers are recommended for restricted or awkward and out of reach apertures. Duplex handle openers lock in two places and are recommended for side hung openings over 1220mm high, giving enhanced security and weatherproofing.

Teleflex gearing

*Spring catch No.36**

*B59 OG Classic slide stay, gas tap operated/butterfly**

*B59KN OG Classic slide stay with round knob**

*Pole operated single folding opener***

*M1255 Linked folding opener***

*B99D Double folding opener**

*B99S Single folding opener with ring pull**

Duplex handle linked sets, not available with the 158SF 'Hampstead' handle

ALTERNATIVE OPENERS FOR DOORS

We also offer a range of alternative openers for our steel doors as shown below.

The cremone bolt/espagnolette locking system offers a distinctive slim fitting which fits snugly within the door frame. Operated by a handle which slides bolts to both the top and bottom for a secure fit, this opener is best suited to openings such as Juliet balconies, where security is not an issue.

*Face bolts No.85**

*Cremone bolt / espagnolette locking system in polished brass finish Non BS 3621 compliant****

* Available in standard finishes ** Anodised aluminium finish only *** Available in premium finishes

TYPICAL MARKINGS FOR SAFETY GLASS

Please note a visible mark will appear on each individual pane of glass on window and door products where safety glass is required. This is a requirement of Building Regulations and customers would need to seek Building Control dispensation in writing, in order for Clement to remove this.

Typical marking for fire rated glass

Typical marking for laminated glass

Typical marking for toughened safety glass

TRICKLE VENTS AND RESTRICTORS

Trickle vents are small openings in a window which allow some ventilation when the windows are closed. The trickle vent can be set into the timber sub-frame or into the steel window frame, depending on the exact specification of your project. Trickle vents can be coated in a polyester powder coat paint to match your windows.

Trickle vents are supplied when required in accordance with Document F of the Building Regulations. They can be fitted at the head of the moving vent or in a new timber subframe.

Trickle vent exterior, close up and interior examples fitted to Brooking windows in RAL 9005 Black.

Restrictors are available to prevent windows from opening too far in situations where safety or security is a particular priority.

Restrictor for SMW and Brooking ranges

Restrictor for all other window ranges

CLEMENT WINDOWS GROUP

Clement has its origins in the nineteenth century when the Clement family first became involved in the fenestration industry. It now has a broad range of shareholders who are committed to the Clement Windows Group and its development.

Today Clement Windows Group manufactures an innovative range of steel windows and doors, which are regularly specified for use in Listed Buildings and Conservation Areas, as well as new build projects. All of our windows are crafted to your bespoke design in our ISO 9001 approved factory. Our range includes the beautiful steel doors and screens which have become popular with architects and designers over recent years and we offer a striking range of conservation rooflights.

We are very proud of the association Clement has with quality and aesthetics, as is evidenced by our past client list which includes well known buildings such as Old Marylebone Town Hall in London, The Pithay in Bristol, Norwich City Hall and the Eldorado Building in Manhattan.

At Clement our aim is to provide superb quality products that will enhance the look of your property for generations to come. We are committed to developing an increased range of fit for purpose products that are environmentally friendly and meet the highest levels of specification and performance. From initial enquiry to the fitting of your new windows by our friendly and efficient installation teams, we strive to ensure every customer receives the best possible service.
