### Other materials available

- Self-binding gravel
- Gabion stone
- Rock salt

### Notes:

Photography is for illustrative purposes only and all of the above swatches are shown wet.

The gradings shown are for guidance and are not absolute.

Representative aggregate samples can be sent on request. We would advise this be done prior to placing an order if you have any doubts.

As materials are naturally occurring, colour variation can and will occur. We therefore recommend that sufficient material is ordered to complete the whole installation in order to minimise this risk.

*The Brett Group is the one of the UK's largest and best established independent manufacturers and suppliers of bulk, loose aggregates, minerals and dried materials to both the UK and global markets.*

As a big independent owner of quarries, we can combine our extensive knowledge of materials and markets with flexible production capabilities to provide solutions to meet the most challenging criteria.

- Our expertise in sourcing aggregates allows us to supply from UK and European locations thereby maximising product choice in terms of both availability and cost effectiveness
- We have wide-ranging experience in the supply of decorative aggregates and bulk minerals to both the commercial and residential markets so you can trust us to deliver
- We cover all of the key considerations for your project including product, coverage, access for deliveries, delivery requirements and timescales – all to make your life easier
